Reduce the time you spend on acquiring software.

1. Choose software product
2. Select license type and assign hosts
3. Request licenses and download software

Access automated 24x7 self-service

Implement re-mixes in minutes vs. days

Receive software update releases and re-mix notifications

Glossary of Terms

Term	Description
Enterprise Agreement	A multi-year (standard is 3 years) strategic relationship that offers access to Keysight's software portfolio through an agreed upon subscription software capacity pool.
Keysight Software Manager (KSM)	The operations and administration system for software access that includes the self-service Enterprise Licensing Portal for provisioning and re-mixing of subscription software capacity pools.
Subscription Software	Offers access to software licenses through the term of the subscription.
Subscription License Types	<ul style="list-style-type: none"> • Node-locked: Use this license on one specified instrument/ computer. • Transportable: Use this license on one instrument/computer at a time. It comes with the option to transfer it to another instrument/computer using Keysight Software Manager. • Floating: Networked instruments/computers may access a license from a server one at a time. Purchase multiple licenses for concurrent usage.
Subscription Software Support	<ul style="list-style-type: none"> • Software subscription licenses include software support through the term of the license. • Ensure your software is always current with the latest enhancements and measurement standards. • Gain additional insight into your measurement challenges with live access to our technical experts. • Stay on schedule with fast turnaround times and priority escalations when you need support.
Capacity Pool	A pool of software that is yours to define and deploy to address every phase of your product lifecycle.
Expansion Pool	An optional reserve pool of software that is yours to access in the event of unexpected requirements or new projects.
Re-mixable	Provides the ability to change the products available in the capacity pool at specified periodic intervals.
